gquotient

Task it – Task Management Application Utilizing Kinvey mBaaS

Rajiv Ram V – Green Quotient Systems

June 3rd 2015
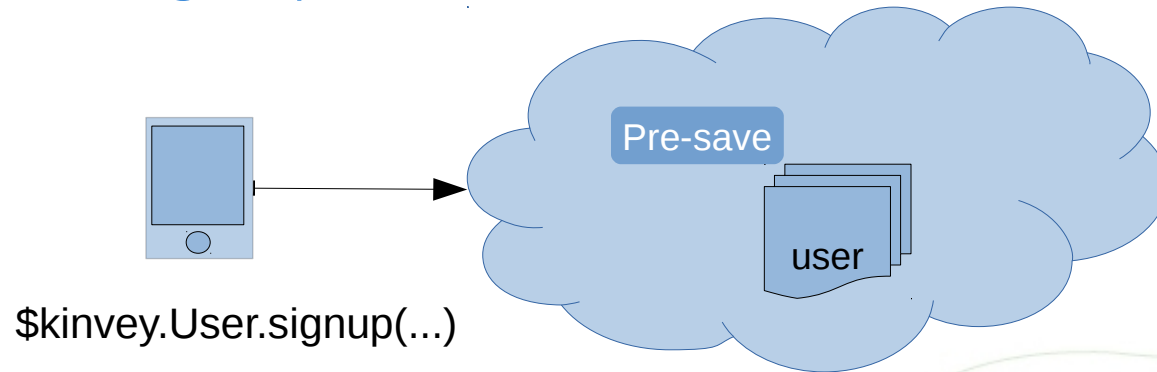

www.gquotient.com

kinvey

What the app does

- Add users from the front end

- Users can add tasks with some parameters. The status of these tasks are set as *'Not approved'* by default

- An admin user can approve these task

- A user will be able to see only the task that he/she created. An admin user will be able to see the tasks created by all users

Built with

- Frameworks
  - AngularJs with ui-router to modularize the app into states
  - Twitter bootstrap for the UI components styling
- Dependency management – Bower and npm
- Build tool - gulp

Demo walk-through

1 Launch the application without any active user and proceed to sign up and email verification
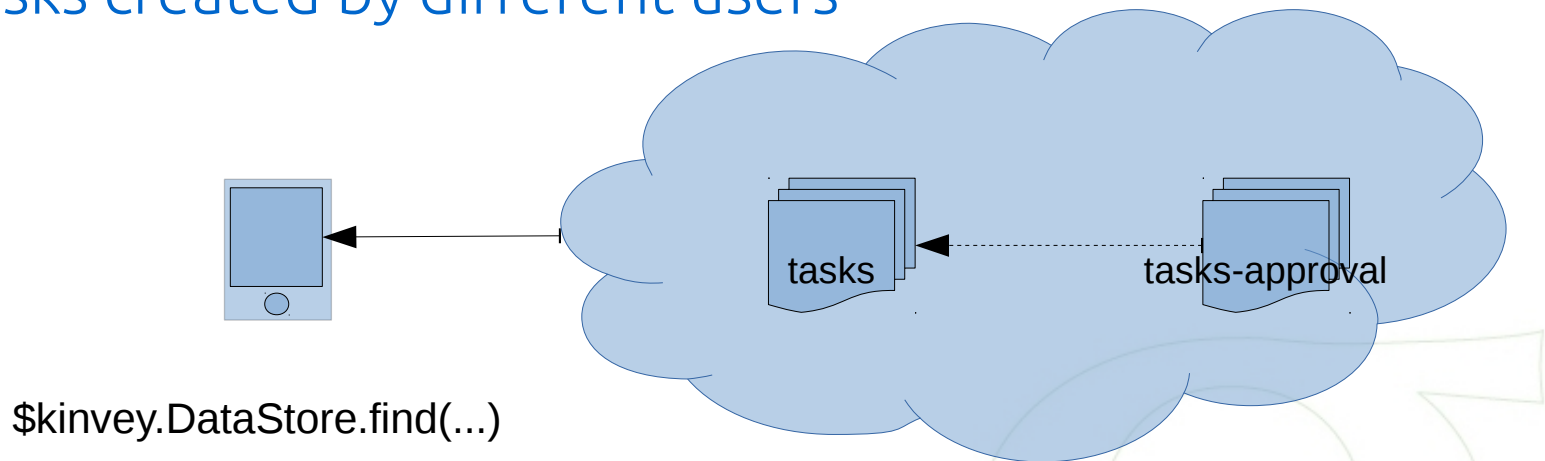

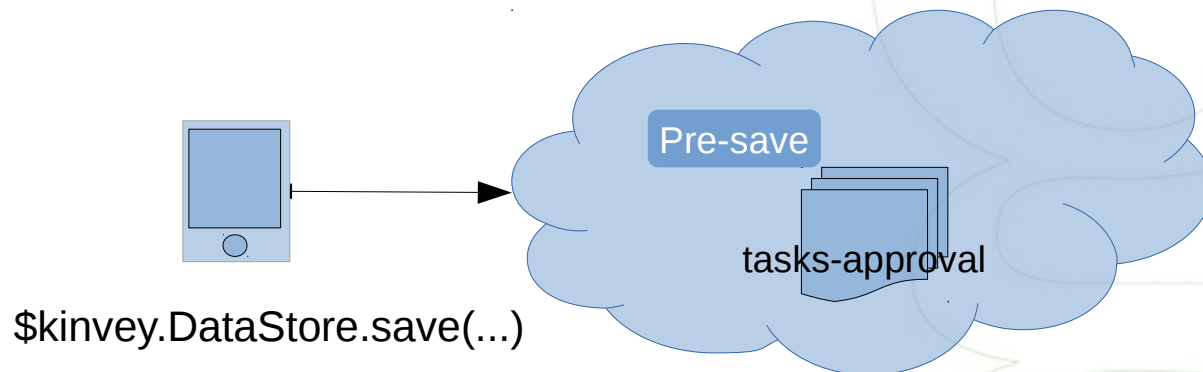

Pre-save

user

$kinvey.User.signup(...)

2 Create a task with this new user

Pre-save   Post-save

tasks   tasks-approval

$kinvey.DataStore.save(...)

Demo walk-through

gquotient

3 Logout and login as the admin user and view all the tasks created by different users

tasks

tasks-approval

$kinvey.DataStore.find(...)

4 Approve the task that was just created

Pre-save

tasks-approval

$kinvey.DataStore.save(...)

Thank you
